Brain circuitry in simplex autism	\$250,000	Q2.Other	Washington University in St. Louis
Brain region specific oxidative stress	\$25,575	Q2.2	Brigham and Women's Hospital
Builiding tacting and joint attention skills with the use of ACS	\$30,000	Q4.4	Rutgers University
Caspr2 dysfunction in autism spectrum disorders	\$28,000	Q2.Other	Yale University
Cell repository	\$4,318,579	Q2.1	Rutgers, The State University of New Jersey
Cellular and molecular alterations in gabaergic inhibitory circuits by mutations in MECP2, a gene implicated in the Rett syndrome of the autism spectrum disorders	\$441,032	Q4.5	Cold Spring Harbor Laboratory
Chart review of 38 cases of recovery from autism	\$35,117	Q4.Other	Center for Autism and Related Disorders
Clinical and gene signatures of ASDs	\$61,000	Q1.3	University of British Columbia
Clinical Trials Network (CTN)	\$200,000	Q4.7	Autism Speaks
Cognitive-behavioral group treatment for anxiety symptoms in adolescents with high-functioning autism spectrum disorders	\$100,000	Q4.4	University of Colorado Denver
Cognitive control and social engagement among younger siblings of children with autism	\$28,000	Q2.Other	University of Miami
Cognitive neuroscience - 1	\$142,158	Q2.Other	Massachusetts Institute of Technology
Cognitive neuroscience - 2	\$111,690	Q2.Other	Boston University School of Medicine
Cognitive neuroscience -3	\$70,933	Q2.Other	Boston Children's Hospital
Cognitive neuroscience - 4	\$80,571	Q2.Other	Massachusetts General Hospital
Collaborative neuropathology workgroup: A comprehensive multilevel analysis of frontal lobe microstructure in autism	\$166,000	Q2.5	University of California, San Diego
Communication and prosody in autism: A pilot fMRI study using a sib-pair design	\$60,000	Q2.5	Washington University in St. Louis
Comparison of high to low intensity behavioral intervention	\$121,029	Q4.7	Center for Autism and Related Disorders
Comprehensive follow-up of novel autism genetic discoveries	\$289,026	Q3.8	Massachusetts General Hospital
Comprehensive genetic variation detection to definitively assess the role of the X chromosome in autism	\$1,019,797	Q3.2	Emory University
Connectopathic analysis of autism	\$234,451	Q4.5	Harvard University
Consequences of maternal antigen exposure on offspring immunity: An animal model of vertical tolerance	\$137,000	Q2.Other	The Fox Chase Cancer Center
Cortical mechanisms underlying visual motion processing impairments in autism	\$60,000	Q2.5	Harvard Medical School
Demonstration of the novel RASL/DASL method for analysis of gene expression in frontal cortex in autism and control cases	\$62,103	Q3.8	University of California, San Diego

Project Title	Funding	Strategic Plan Objective	Institution
Dendritic organization within the cerebral cortex in autism	\$140,000	Q2.5	The Open University
Deriving neuroprogenitor cells from peripheral blood of ndividuals with autism	\$60,000	Q2.2	University of Utah
Description and assessment of sensory abnormalities in SD	\$18,968	Q2.Other	Center for Autism and Related Disorders
Desensitization techniques for difficult behaviors	\$25,000	Q4.Other	Southwest Autism Research & Resource Center
levelopmental and augmented intervention for acilitating expressive language	\$600,000	Q4.3	University of California, Los Angeles
Developmental versus acute mechanisms mediating ltered excitatory synaptic function in the fragile X yndrome mouse model	\$150,000	Q2.Other	University of Texas Southwestern Medical Center
evelopment of an executive function-based intervention or ASD	\$60,000	Q4.4	Children's National Medical Center
evelopment of brain connectivity in autism	\$300,000	Q2.5	New York School of Medicine
Development of categorization and facial knowledge in offants at-risk for autism - AS	\$31,000	Q1.4	University of Pittsburgh
Differential effects of thimerosal on cell division and poptosis in normal vs. autism spectrum disorder cell nes	\$60,000	Q3.1	The Methodist Hospital Houston
DNA methylation and other epigenetic studies of autism orain	\$29,000	Q3.Other	Baylor College of Medicine
ouble blind placebo controlled evaluation of uconazole	\$15,134	Q4.6	Center for Autism and Related Disorders
Oouble blind placebo controlled trial of hyperbaric xygen	\$60,021	Q4.6	Center for Autism and Related Disorders
Double-blind placebo controlled trial of subcutaneous nethyl B12 on behavioral and metabolic measures in shildren with autism	\$150,000	Q4.8	University of California, Davis
Double masked placebo controlled trial of cholesterol in pypocholesterolemic ASD	\$300,000	Q4.8	Kennedy Krieger Institute
hysregulation of p13/AKT in mouse models for social atteraction deficits and for ASD with macrocephaly	\$204,926	Q4.5	University of Texas Southwestern Medical Center
arly biologic markers for autism	\$60,000	Q3.Other	Kaiser Foundation Research Institute
arly developmental risk factors for autism in a national irth cohort	\$60,000	Q3.6	Turku University
arly intervention for children screened positive for utism by the first year inventory	\$200,000	Q4.3	University of North Carolina at Chapel Hill
iffectiveness of sensory based strategies for improving daptive behaviors in children with autism	\$150,000	Q4.4	Thomas Jefferson University

Project Title	Funding	Strategic Plan Objective	Institution
Effect of oxytocin receptor inhibitor (Atosiban) during the perinatal period and prevalence of autism spectrum disorders	\$150,000	Q3.Other	Hebrew University
Effects of follow-through during DTT on verbalizations	\$11,231	Q4.Other	Center for Autism and Related Disorders
Effects of parent-implemented intervention for toddlers with autism spectrum	\$300,000	Q4.3	Florida State University
Efficacy of community-based instruction and supported employment on the competitive employment outcomes on transition-age youth with autism	\$60,000	Q4.4	Virginia Commonwealth University
Electrical measures of functional cortical connectivity in autism	\$60,000	Q2.5	University of Washington
Enhancing inter-subjectivity in infants at high-risk for autism	\$213,000	Q4.3	IWK Health Centre/Dalhousie University
Enhancing social communication for children with HFA	\$46,000	Q4.4	University of Haifa
Enhancing social functioning among adolescents with Asperger's syndrome and high functioning autism	\$60,000	Q4.4	Penn State Milton S. Hershey Medical Center
Epigenetics, hormones and sex differences in autism incidence	\$100,000	Q3.1	University of Virginia
Epstein-Barr virus research	\$30,000	Q2.Other	Pediatric Gastrointestinal Association
Establishing liquid medication administration compliance	\$27,985	Q4.Other	Center for Autism and Related Disorders
Ethics of communicating scientific findings on autism risk	\$25,000	Q3.Other	Drexel University School of Public Health
Ethnicity and the elucidation of autism endophenotypes	\$61,000	Q1.4	Washington University in St. Louis
Etiology of autism risk involving MET gene and the environment	\$220,000	Q3.8	University of California, Davis
Evaluating a 3D VLE for developing social competence	\$100,000	Q4.Other	University of Missouri
Evaluating behavioral and neural effects of social skills intervention for school-age children with autism spectrum disorders	\$60,000	Q4.1	Mount Sinai School of Medicine
Evaluating intensive early behavioral intervention in autism	\$40,000	Q4.3	Temple University
Evaluating the effectiveness of the social cognition training tool (SCOTT) in ASD on behavioral, occulomotor, and neuronal levels	\$60,000	Q4.4	Max Planck Institute for Human Development
Evaluation of behavior problems in children with ASD	\$30,025	Q1.Other	Center for Autism and Related Disorders
Evaluation of E-learning for training behavioral therapists	\$74,835	Q5.4	Center for Autism and Related Disorders
Evaluation of sleep disturbance in children with ASD	\$27,456	Q2.Other	Center for Autism and Related Disorders
Evaluation of web-based curriculum assessment and program design	\$51,003	Q5.4	Center for Autism and Related Disorders
Examination of rerequisite skills for learning using video modeling	\$30,000	Q4.4	New England Center for Children

Project Title	Funding	Strategic Plan Objective	Institution
Executive functioning, theory of mind, and neurodevelopmental outcomes	\$118,007	Q1.4	Vanderbilt University Medical Center
Exploring functional brain connectivity for visual cognition in autism spectrum disorder	\$60,000	Q2.5	University of Kentucky
Exploring the role of CC2D1A in neuronal development and synaptic function	\$49,000	Q3.8	Harvard University
Exploring the role of synaptic proteins in mouse models of autism	\$66,228	Q2.Other	The Rockefeller University
Exploring the role of synaptic proteins in mouse models of autism	\$165,572	Q4.5	The Rockefeller University
Family characterization network - 1	\$463,694	Q2.5	Massachusetts General Hospital
Family characterization network - 2	\$5,353	Q2.5	Boston University School of Medicine

Family recruitment network - 5	\$17,236	Q3.2	Massachusetts General Hospital
Family study of autism: Genomic and proteomic markers	\$150,000	Q1.3	Southwest Autism Research & Resource Center
Family support network - 1	\$83,219	Q5.1	Boston Medical Center
Family support network - 3	\$46,874	Q5.1	Tufts Medical Center
Family support network - 4	\$73,289	Q5.1	Massachusetts General Hospital
Family support network - 5	\$39,234	Q5.1	Boston Children's Hospital
Family support network - 6	\$44,411	Q5.1	Boston Medical Center
Feeding problems in children with ASD: Impact of parent education in modifying aberrant eating habits	\$30,000	Q4.4	Marcus Institute
FMRI evidence of genetic influence on rigidity in ASD	\$28,000	Q2.5	University of Michigan
FMRI studies of cerebellar functioning in autism	\$47,500	Q2.5	University of Illinois at Chicago
Function and dysfunction of neuroligins	\$498,665	Q4.5	Stanford University
Gamma band dysfunction as a local neuronal connectivity endophenotype in autism	\$61,000	Q2.5	University of Colorado Denver
Gene-environment interactions in the pathogenesis of autism-like neurodevelopmental damage: A mouse model	\$60,000	Q3.Other	Johns Hopkins University School of Medicine
Gene expression profiling of autism spectrum disorders	\$51,000	Q3.8	Boston Children's Hospital
Gene finding - 1	\$85,275	Q3.8	Massachusetts General Hospital
Gene finding - 2	\$23,055	Q3.8	Boston Children's Hospital
Generation of genetic models of autism in mice	\$60,000	Q4.5	New York University School of Medicine

Project Title	Funding	Strategic Plan Objective	Institution
Senetic and epigenetic interactions in a mouse model or autism	\$60,000	Q3.Other	David Geffen School of Medicine at University of California, Los Angeles
Genetic basis of autism	\$6,175,430	Q3.8	Cold Spring Harbor Laboratory
Genetic studies of autism susceptibility	\$50,000	Q3.8	Rutgers University
Genome-wide analyses of DNA methylation in autism	\$400,000	Q3.Other	Massachusetts General Hospital
Senome-wide association study of autism characterized y developmental regression	\$150,000	Q3.2	Cincinnati Children's Hospital Medical Center
Senomic imbalances at the 22q11 locus and redisposition to autism	\$400,000	Q4.5	Columbia University
Senomic imbalances in autism - AS	\$49,500	Q3.8	University of Chicago
Senomic resources for identifying genes regulating ocial behavior	\$60,000	Q3.8	Emory University
dentical twins discordant for autism: Epigenetic (DNA nethylation) biomarkers of non-shared environmental nfluences	\$100,000	Q3.Other	Institute of Psychiatry, King's College London
dentification and functional characterization of gene arriants	\$60,000	Q2.Other	Universita Campus Bio-Medico di Roma
dentification of aberrantly methylated genes in autism: 'he role of advanced paternal age	\$499,780	Q3.Other	Research Foundation for Mental Hygiene, Inc.
dentification of autism candidate genes on the X- chromosome from copy number variants identified by 500K SNP-CHIP analysis	\$55,000	Q3.8	Centre For Addiction And Mental Health
dentification of UBE3A substrates using proteomic profiling in Drosophila	\$60,000	Q2.Other	University of Tennessee Health Science Center
dentifying and understanding the action of autism usceptibility genes	\$409,620	Q3.8	University of Oxford
dentifying factors that predict response to intervention	\$21,965	Q4.Other	Center for Autism and Related Disorders
dentifying gastrointestinal (GI) conditions in children vith autism spectrum disorders (ASD)	\$150,000	Q1.3	Harvard Medical School
maging synaptic neurexin-neuroligin complexes by proximity biotinylation: Applications to the molecular pathogenesis of autism	\$47,500	Q2.Other	Massachussetts Institute of Technology
nitation in autism	\$61,000	Q1.4	King's College, London
nmune molecules and cortical synaptogenesis: lossible implications for the pathogenesis of autism	\$150,000	Q2.Other	University of California, Davis
nmunobiology in autism	\$32,000	Q3.6	University of California, Davis
npact of innate immunity on regressive autism	\$110,000	Q2.2	University of Medicine & Dentistry of New Jersey
mproved quality of life for people with autism and their amilies by integrating biomedical and behavioral pproaches	\$100,000	Q4.Other	State University of New York

Project Title	Funding	Strategic Plan Objective	Institution
Increasing social engagement in young children with ASD using video self-modeling and peer training	\$30,000	Q4.4	Indiana Resource Center for Autism
Influence of maternal cytokines during pregnancy on effector and regulatory T helper cells as etiological factors in autism	\$110,000	Q3.6	University of Medicine & Dentistry of New Jersey
Influence of maternal cytokines on activation of the innate immune system as a factor in the development of autism	\$32,000	Q3.6	University of Medicine & Dentistry of New Jersey
Influence of oxidative stress on transcription and alternative splicing of methionine synthase in autism	\$28,000	Q2.2	Northeastern University
Influence of the maternal immune response on the development of autism	\$150,000	Q3.6	University of Medicine & Dentistry of New Jersey
Informatics - 1	\$10,408	Q6.1	Harvard Medical School
Informatics - 2	\$411,912	Q6.1	Massachusetts General Hospital
Informational and neural bases of empathic accuracy in autism spectrum disorder	\$28,000	Q2.5	Columbia University
Infrastructure support for autism research at MIT	\$750,000	Other	Massachusetts Institute of Technology
Innovative technology for mapping social engagement in children with autism: Adaptive physiological profiling in real time	\$60,000	Q4.1	Vanderbilt University
Integrated play groups: Promoting social communication and symbolic play with peers across settings in children with autism	\$150,000	Q4.4	San Francisco State University
Interactions between mothers and young children with ASD: Associations with maternal and child characteristics	\$61,000	Q1.Other	University of Haifa
Interactions of environment and molecular pathways on brain overgrowth in autism: Maternal inflammation and the PI3/AKT pathway	\$211,200	Q3.6	University of California, Los Angeles
Interactive Autism Network (IAN)	\$2,200,000	Q6.1	Kennedy Krieger Institute
International trends in diagnoses and incidence of autism spectrum disorders	\$64,023	Q1.2	Telethon Institute for Child Health Research
Intervention for infants at risk for autism	\$150,000	Q4.3	University of California, Davis
Intervention for infants at risk for autism	\$150,000	Q4.3	University of Washington
Investigation of cortical folding complexity in children with autism, their autism-discordant siblings, and controls	\$100,000	Q2.5	Stanford University
Investigation of genes involved in synaptic plasticity in Iranian families with ASD	\$60,000	Q3.9	Massachusetts General Hospital
Investigation of the link between early brain enlargement and abnormal functional connectivity in autism spectrum disorders	\$120,000	Q2.5	University of Washington

Project Title	Funding	Strategic Plan Objective	Institution
Investigation of the role of MET kinase in autism	\$488,411	Q4.5	Johns Hopkins University School of Medicine
Is autism a mitochondrial disease?	\$60,000	Q2.2	University of California, Davis
Joint attention intervention for caregivers and their children with autism	\$51,000	Q4.4	University of California, Los Angeles
Joint attention intervention for nonverbal children with ASD	\$60,000	Q4.4	University of California, Los Angeles
KZN autism study	\$60,000	Q1.Other	University of KwaZulu-Natal
Language learning in autism	\$112,159	Q1.5	Georgetown University
Language processing in children with 22q11 deletion syndrome and autism	\$150,000	Q1.4	Emory University
Linguistic perspective-taking in adults with high- functioning autism: Investigation of the mirror neuron system	\$28,000	Q2.5	Carnegie Mellon University
Linking autism and congenital cerebellar malformations	\$60,000	Q3.Other	University of Chicago
Longitudinal neurogenetics of atypical social brain development in autism	\$146,082	Q2.5	Yale University
Long-term follow-up of children with autism who recovered	\$33,965	Q4.Other	Center for Autism and Related Disorders
Markers of inflammation and oxidative damage	\$50,000	Q2.2	Research Foundation for Mental Hygiene, Inc.
Maternal dietary factors and risk of ASDs	\$32,000	Q3.6	Harvard Medical School
Maternal infection and autism: Impact of placental sufficiency and maternal inflammatory responses on fetal brain development	\$130,000	Q2.Other	Stanford University
Maternal risk factors for autism in the Nurses Health Study II – pilot study	\$60,000	Q3.6	Harvard School of Public Health
Maternal supplementation of folic acid and function of autism gene synaptic protein Shank3 in animal model	\$110,000	Q3.6	Baylor College of Medicine
Measuring Hg body burden in 3 groups	\$14,960	Q3.1	University of Texas
Measuring the effects of training parents to provide intervention via the Arizona telemedicine program	\$60,000	Q4.4	Southwest Autism Research & Resource Center
Meg investigation of the neural substrates underlying visual perception in autism	\$130,000	Q2.5	Massachussetts General Hospital
MET receptor tyrosine kinase and autism spectrum disorder	\$62,500	Q3.9	Vanderbilt University
Mice lacking Shank postsynaptic scaffolds as an animal model of autism	\$250,806	Q4.5	Massachusetts Institute of Technology
Mimicry and imitation in ASDs	\$32,000	Q2.5	University of Connecticut
Mis-regulation of BDNF in autism spectrum disorders	\$150,000	Q1.3	Weill Cornell Medical College
Mitochondria and autism	\$690,460	Q1.3	University of California, Irvine; University of California, San Diego

Project Title	Funding	Strategic Plan Objective	Institution
Modeling and pharmacologic treatment of autism spectrum disorders in Drosophila	\$150,000	Q2.Other	Albert Einstein College of Medicine of Yeshiva University
Models and mechanisms - 1	\$127,050	Q4.5	Massachusetts Institute of Technology
Models and mechanisms - 2	\$90,000	Q4.5	Boston Children's Hospital
Molecular and environmental influences on autism pathophysiology	\$150,000	Q3.1	University of California, Los Angeles
Molecular basis of autism associated with human adenylosuccinate lyase gene defects	\$30,000	Q2.Other	University of Delaware
Motor control in young children with autism	\$60,000	Q1.4	University of Florida
Mouse genetic model of a dysregulated serotonin transporter variant associated with autism	\$60,000	Q2.Other	Vanderbilt University
MRI study of brain development in school age children with autism	\$150,000	Q2.5	University of North Carolina at Chapel Hill
Multi-registry analyses - data management core	\$66,000	Q3.9	Columbia University
Multi-registry analyses - Denmark	\$72,000	Q3.9	Emory University
Multi-registry analyses - Finland	\$36,000	Q3.9	Turku University
Multi-registry analyses - Israel	\$36,000	Q3.9	The Gertner Institute of Epidemiology and Health Policy Research
Multi-registry analyses - Norway	\$36,000	Q3.9	Norwegian Institute of Public Health
Multi-registry analyses - Sweden	\$36,000	Q3.9	Karolinska Institutet
Multi-registry analyses - West Australia	\$36,000	Q3.9	The University of Western Australia
Multisensory processing in autism	\$145,000	Q2.5	University of North Carolina at Chapel Hill
Mutation analysis of candidate genes derived from an autism protein interaction network in SSC autism samples	\$1,133,994	Q3.8	Baylor College of Medicine
Naturalistic observation diagnostic assessment for autism	\$25,000	Q1.1	Southwest Autism Research & Resource Center
Neural and cognitive mechanisms of autism	\$1,500,000	Q4.5	Massachusetts Institute of Technology
Neural basis of audiovisual integration during language comprehension in autism	\$30,000	Q2.5	University of Rochester
Neural basis of socially driven attention in children with autism	\$28,000	Q2.5	University of California, Los Angeles
Neural circuit deficits in animal models of Rett syndrome	\$44,000	Q2.Other	Cold Spring Harbor Laboratory
Neural correlates of serotonin transporter gene polymorphisms and social impairment in ASD	\$150,000	Q2.5	University of Michigan
Neural correlates of social exchange and valuation in autism	\$150,000	Q2.5	Baylor College of Medicine
Neural mechanisms for social cognition in ASD	\$238,040	Q2.5	Massachusetts Institute of Technology
Neural mechanisms of social cognition and bonding - AS	\$31,500	Q2.Other	Emory University

Project Title	Funding	Strategic Plan Objective	Institution
Neurexin-neuroligin trans-syanptic interaction in learning and memory	\$200,000	Q4.5	Columbia University
Neurogenic growth factors in autism	\$150,000	Q3.Other	Yale University
Neuroligins and neurexins as autism candidate genes: Study of their association in synaptic connectivity	\$60,000	Q2.Other	University of California, San Diego
Neuronal nicotonic receptor modulation in the treatment of autism: A pilot trial of mecamylamine	\$58,000	Q4.8	The Ohio State University
Neuronal oxidative stress in autism	\$37,500	Q2.2	Case Western Reserve University
Neuronal populations related to deficits in social emotions and cognition in autism: A neurobiological and genomics approach	\$62,500	Q3.8	California Institute of Technology
Neuropharmacology of motivation and reinforcement in mouse models of autistic spectrum disorders	\$150,000	Q2.Other	University of North Carolina School of Medicine
Neurophysiological indices of risk and outcome in autism	\$61,000	Q1.3	University of Washington
Novel approaches for investigating the neurology of autism: Detailed morphometric analysis and correlation with motor impairment	\$150,000	Q2.5	Kennedy Krieger Institute
Novel methods for testing language comprehension in children with ASD	\$150,000	Q1.2	Boston University
Novel models to define the genetic basis of autism	\$800,694	Q4.5	Cold Spring Harbor Laboratory
NrCAM, a candidate susceptibility gene for visual processing deficits in autism	\$150,000	Q2.Other	University of North Carolina at Chapel Hill
Optical analysis of circuit-level sensory processing in the cerebellum	\$49,000	Q2.Other	Princeton University
Oxidative stress: Rat study	\$40,000	Q4.5	Brigham and Women's Hospital
Oxidative stress and immune response in autism	\$60,000	Q2.5	New York State Institute for Basic Research in Developmental Disabilities
Oxytocin biology and the social deficits of autism spectrum disorders	\$112,500	Q1.3	Stanford University
Parent mediated behavioral treatment of food selectivity	\$30,966	Q4.Other	Center for Autism and Related Disorders
Parents and professionals attitudes to dietary interventions in ASD (PADIA)	\$109,658	Q4.6	Newcastle University
Past, present and future-oriented thinking about the self in children with ASD	\$61,000	Q2.5	City University, London
Pathway-based genetic studies of autism spectrum disorder	\$60,000	Q2.Other	University of Pennsylvania
Peer-mediated intervention for elementary chool students with ASD	\$60,000	Q4.4	University of Colorado Denver
Perturbed activity dependent plasticity mechanisms in autism	\$296,372	Q4.5	Harvard Medical School
Phonological processing in the autism spectrum	\$32,000	Q2.5	Heriot-Watt University

Project Title	Funding	Strategic Plan Objective	Institution
Pilot project to assess web-based family recruitment for autism genetics studies	\$998,654	Q1.Other	University of California, Los Angeles; Washington University in St. Louis; Kennedy Krieger Institute
Potential role of noncoding RNAs in autism	\$60,000	Q3.8	Children's Mercy Hospitals and Clinics
Presence of clostridia in children with and without ASD	\$12,054	Q2.Other	Center for Autism and Related Disorders
Preventing autism via very early detection and ntervention	\$14,256	Q4.9	Center for Autism and Related Disorders
Probing a monogenic form of autism from molecules to ehavior	\$187,500	Q4.5	Stanford University
Probiotics and vitamin D in ASD	\$20,000	Q4.6	Oregon Health & Science University
Promoting communication skills in toddlers at risk for autism	\$300,000	Q4.3	University of California, Los Angeles
Promoting early social-communicative competency in oddlers with autism	\$323,000	Q4.3	University of Northern Colorado
Prospective examination of 6-year cumulative incidence of ASDs: A total population study	\$60,000	Q3.9	Yale University
Psychometric evaluation of the autism symptom diagnostic scale	\$8,975	Q1.Other	Center for Autism and Related Disorders
Psychometric evaluation of the behavior problems nventory in ASD	\$25,032	Q1.Other	Center for Autism and Related Disorders
Psychometric evaluation of the QABF in children with ASD	\$11,069	Q1.Other	Center for Autism and Related Disorders
Psychophysiological approaches to the study of autism	\$26,000	Q2.Other	University of Washington
sychophysiological mechanisms of emotion perception	\$60,000	Q2.5	Georgia State University
Quality of life for children with autism spectrum disorders and their parents	\$150,000	Q1.Other	Massachusetts General Hospital
Quantifying white matter connectivity in autism	\$61,000	Q2.5	University of Utah
Raising glutathione levels in children with autism	\$24,516	Q4.6	University of Texas
Recessive genes for autism and mental retardation	\$289,040	Q3.8	Beth Israel Deaconess Medical Center
Regulation of inflammatory TH17 cells in ASD	\$112,500	Q2.2	New York University School of Medicine
Regulation of synaptogenesis by cyclin dependent kinase 5	\$327,398	Q4.5	Massachusetts Institute of Technology
Relation of sleep epileptiform discharges to insomnia and daytime behavior	\$60,000	Q2.Other	Vanderbilt University
Relevance of NPAS1/3 balance to autism and chizophrenia	\$475,787	Q3.2	University of Texas Southwestern Medical Center
Remote parent training project	\$70,000	Q4.Other	Southwest Autism Research & Resource Center
Robotics and speech processing technology for the acilitation of social communication training in children with autism	\$100,000	Q4.4	University of Southern California

Project Title	Funding	Strategic Plan Objective	Institution	
Role of micro-RNAs in ASD affected circuit formation and function	\$150,000	Q3.8	University of California, San Francisco	
Role of neuroligin in synapse stability	\$150,000	Q2.Other	Oklahoma Medical Research Foundation	
Role of Pam in synaptic morphology and function	\$150,000	Q2.Other	Massachusetts General Hospital	
Role of TSC/mTOR signaling pathway in autism and autism spectrum disorders	\$178,843	Q3.2	Massachusetts General Hospital	
Role of UBE3A in neocortical plasticity and function	\$367,500	Q4.5	Duke University	
Role of Wnt signaling through Dishevelled, Dact and p120catenin in forebrain development, synaptic physiology, and mouse behavior: Exploration of a pathway with many components linked to autism spectrum disorders	\$210,122	Q4.5	University of California, San Francisco	
Roles of Wnt signaling/scaffolding molecules in autism	\$28,000	Q2.Other	University of California, San Francisco	
Safety and efficacy of complementary and alternative medicine for autism spectrum disorders	\$100,000	Q4.6	University of California, San Francisco	
Scales, procedures, and intervention programs for estimating the prevalence of childhood disability and autism in Bangladesh	\$59,966	Q1.4	Dhaka Shishu (Children's) Hospital, Bangladesh Institut of Child Health	
Self-management of daily living skills: Development of cognitively accessible software for individuals with autism	\$50,000	Q4.7	Eugene Research Institute	
SFARI Base - A web interface for database characterizing the study subjects from Simons Simplex Collection	\$698,000	Other	Mindspec, Inc.	
Signatures of gene expression in ASD	\$150,000	Q1.3	Boston Children's Hospital	
Simons Simplex Collection Site - 1	\$458,174	Q3.8	Baylor College of Medicine	
Simons Simplex Collection Site - 10	\$172,538	Q3.8	University of Missouri	
Simons Simplex Collection Site - 11	\$458,000	Q3.8	Columbia University	
Simons Simplex Collection Site - 12	\$316,564	Q3.8	Vanderbilt University	
Simons Simplex Collection Site - 13	\$562,415	Q3.8	Boston Children's Hospital	
Simons Simplex Collection Site - 14	\$84,827	Q3.8	University of Massachusetts Medical School	
Simons Simplex Collection Site - 2	\$362,500	Q3.8	University of Washington	
Simons Simplex Collection Site - 3	\$473,036	Q3.8	Washington University in St. Louis	
Simons Simplex Collection Site - 4	\$369,014	Q3.8	University of Illinois at Chicago	
Simons Simplex Collection Site - 5	\$242,504	Q3.8	The Research Institute of the McGill University Health Centre	
Simons Simplex Collection Site - 6	\$393,989	Q3.8	University of California, Los Angeles	
Simons Simplex Collection Site - 7	\$564,055	Q3.8	Yale University	
Simons Simplex Collection Site - 8	\$480,985	Q3.8	Emory University	

Project Title	Funding	Strategic Plan Objective	Institution
Simons Simplex Collection Site - 9	\$1,342,262	Q3.8	University of Michigan
Sleep, neuropsychological, mood, behavior, learning, and developmental problems in children with autism	\$18,085	Q1.4	Penn State College of Medicine
Social behavior deficits in autism: Role of amygdala	\$110,000	Q2.Other	State University of New York Upstate Medical Center
Social cognition and interaction training for adolescents with high functioning autism	\$60,000	Q4.4	University of North Carolina at Chapel Hill
Software for collecting and managing data from Simons Simplex Collection	\$4,145,488	Q6.1	Prometheus Research LLC
Stereological analyses of neuron numbers in frontal cortex from age 3 years to adulthood in autism	\$150,000	Q2.5	University of California, San Diego
Studies of postmortem brain searching for epigenetic defects causing autism	\$400,000	Q3.8	Baylor College of Medicine
Synaptic and circuitry mechanisms of repetitive behaviors in autism	\$400,000	Q4.5	Duke University Medical Center
Teaching children to comprehend rules containing "if/then"	\$38,994	Q4.Other	Center for Autism and Related Disorders
Teaching children to identify causes of others' emotions	\$20,687	Q4.Other	Center for Autism and Related Disorders
Teaching children to identify others' preferences	\$22,058	Q4.Other	Center for Autism and Related Disorders
Teaching theory of mind skills to children with ASD	\$24,025	Q4.Other	Center for Autism and Related Disorders
Technology support for interactive and collaborative visual schedules	\$42,000	Q4.Other	University of California, Irvine
Telemedicine approach to teaching pill-swallowing skills	\$14,168	Q4.Other	Center for Autism and Related Disorders
Temperament, emotional expression, and emotional self-regulation in relation to later ASD diagnosis	\$29,500	Q1.4	Bryn Mawr College
Testing neurological models of autism	\$315,526	Q2.Other	California Institute of Technology
Testing the effects of cortical disconnection in non- human primates	\$150,000	Q4.5	Salk Institute for Biological Studies
The development of Chinese versions of ADOS and ADI-R	\$150,000	Q1.2	Johns Hopkins Bloomberg School of Public Health
The early identification of temperament endophenotypes in ASD	\$61,000	Q1.4	Dalhousie University
The effects of Npas4 and Sema4d on inhibitory synapse formation	\$150,000	Q2.Other	Boston Children's Hospital
The genetic link between autism and structural cerebellar malformations	\$32,000	Q1.3	University of Chicago
The genetics of restricted, repetitive behavior: An inbred mouse model	\$60,000	Q2.Other	University of Florida
The impact of autism specific genomic variations on microRNA gene expression profile	\$88,000	Q3.8	The Hospital for Sick Children
The mirror neuron system in children with autism	\$118,156	Q4.1	University of Washington

Project Title	Funding	Strategic Plan Objective	Institution	
The neural correlates of transient and sustained executive control in children with autism spectrum disorder	\$60,000	Q2.5	University of Missouri	
The pathogenesis of autism: Maternal antibody exposure n the fetal brain	\$110,000	Q3.Other	The Feinstein Institute for Medical Research	
The role of Contactin-associated Protein-like 2 (CNTNAP2) and other novel genes in autism	\$464,601	Q3.8	Johns Hopkins University School of Medicine	
he role of Shank3 in autism spectrum disorders	\$360,000	Q4.5	Mount Sinai School of Medicine	
The role of the autism-associated gene Tuberous Colerosis Complex 2 (TSC2) in presynaptic development	\$55,000	Q2.Other	University of California, San Diego	
The role of the neurexin 1 gene in susceptibility to utism	\$150,000	Q3.Other	Massachusetts General Hospital/Harvard Medical School	
Think Asperger's	\$125,000	Q1.2	Southwest Autism Research & Resource Center	
ibial bone lead levels	\$12,500	Q2.Other	Autism Associates of New York	
raining paraprofessional staff to provide proactive supports for individuals with severe in inclusive settings	\$30,000	Q6.3	Carolina Behavior Analysis and Support Center	
Transcranial magnetic stimulation (RTMS) for evaluation and treatment of repetitive behavior in subjects with autism spectrum disorders	\$60,000	Q4.Other	Columbia University	
Fransition to adulthood: Service utilization and determinants of functional outcomes	\$60,000	Q6.2	Washington University in St. Louis	
Franslational genetic studies in familial ASDs	\$100,000	Q3.8	Massachusetts General Hospital	
ranslation of evidenced based treatment to classrooms	\$30,000	Q4.4	University of California, San Diego	
ransporting evidence-based practices from the cademy to the community: School-based CBT for children with ASD	\$60,000	Q4.4	University of California, Los Angeles	
Treatment of sleep problems in children with autism spectrum disorder with melatonin: A double-blind, placebo-controlled study	\$150,000	Q4.2	Baylor College of Medicine	
Uncovering genetic mechanisms of ASD	\$150,000	Q3.8	Boston Children's Hospital	
Understanding glutamate signaling defects in autism spectrum disorders	\$60,000	Q3.8	Johns Hopkins University	
Understanding perception and action in autism	\$32,000	Q2.5	Kennedy Krieger Institute	
Jrinary assay for HPL	\$11,048	Q2.Other	Autism House	
Ising genetically modified mice to explore the neuronal etwork involved in social recognition	\$60,000	Q2.Other	Haifa University	
Ising zebrafish and chemical screening to define unction of autism genes	\$390,993	Q4.5	Whitehead Institute for Biomedical Research	
/ictimization, pragmatic language, and social and emotional competence in adolescents with ASD	\$60,000	Q2.5	Queen's University	

Project Title	Funding	Strategic Plan Objective	Institution
Video game environments for the integrative study of perception, attention and social cognition in autism and autism sibs	\$59,984	Q1.2	Cornell University
Visual perspective-taking and the acquisition of American Sign Language by deaf children with autism	\$28,000	Q2.5	University of Texas at Austin
Visual system connectivity in a high-risk model of autism	\$41,000	Q2.Other	Boston Children's Hospital
Visuospatial processing in adults and children with autism	\$30,000	Q2.5	Carnegie Mellon University
Vitamin D status and autism spectrum disorder: Is there an association?	\$80,000	Q3.1	University of California, Davis
Vulnerability phenotypes and susceptibility to environmental toxicants: From organism to mechanism	\$110,000	Q2.Other	University of Rochester
